Uploading your Investment Account Manager Portfolio to Yahoo! Finance

Users of Investment Account Manager 4 will find the process of uploading their portfolio holdings to Yahoo! Finance easy to accomplish. This process enables users to easily monitor their holdings from other locations and mobile devices.

Simply follow these steps.

1. Open IAMv4 and select File Menu | Export | Yahoo Portfolio Data

2. Users can then decide to create the file reflecting actual share values (lot by lot) or simply the security names with 1 share of each without actual values. Both methods provide meaningful results available for review once the import process is complete.
